Motor controllers CMMP-AS, for servo motors

Key features

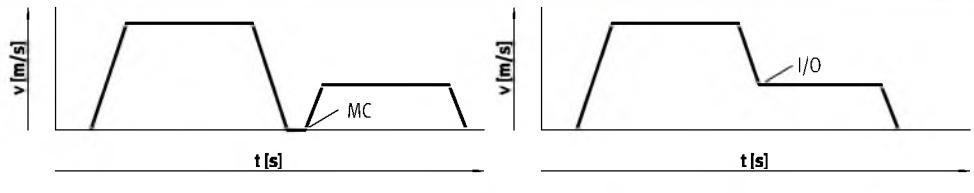

Performance characteristics	
Compactness	<ul style="list-style-type: none">Extremely small dimensionsFull integration of all components for the controller and power section, including USB interface, Ethernet and CANopen interfaceIntegrated brake chopperIntegrated EMC filtersAutomatic actuation for a holding brakeCompliance with the current CE and EN standards without additional external measures (→ 6)
Motion control	<ul style="list-style-type: none">Evaluation of digital absolute encoder (EnDat/HIPERFACE) in single-turn or multi-turn versionsCan be operated as a torque, speed or position controllerIntegrated position controlTime-optimised (trapezoidal) or jerk-free (S-shaped) positioningAbsolute and relative movementsPoint-to-point positioning with and without motion path smoothingPosition synchronisationElectronic gear unit255 position setsWide range of homing methods
Fieldbus interfaces	      
Input/output	<ul style="list-style-type: none">Freely programmable I/OsHigh-resolution 16-bit analogue inputJog/teach modeSimple connection to a higher-order controller via I/O or fieldbusSynchronous operationMaster/slave modeAdditional I/Os with the plug-in card CAMC-D-8E8A → 20
Integrated sequence control	<ul style="list-style-type: none">Automatic sequence of position sets without a higher-order controllerLinear and cyclical position sequencesAdjustable delay timesBranches and wait positionsOverlapping restart possible during the movement
Integrated safety functions	<ul style="list-style-type: none">Depending on the variant or plug-in card, the motor controller supports the following safety functions:<ul style="list-style-type: none">Safe torque off (STO)Safe stop 1 (SS1)Safe stop 2 (SS2)Safe operating stop (SOS)Safely limited speed (SLS)Safe speed range (SSR)Safe speed monitor (SSM)
Interpolating multi-axis movement	<ul style="list-style-type: none">With a suitable controller, the CMMP-AS can perform path movements with interpolation via CANopen or EtherCAT. The controller specifies setpoint position values in a fixed time slot pattern to this end. In between, the servo position controller independently interpolates the data values between two data points.

Motor controllers CMMP-AS, for servo motors

Key features

Travel program

- Linking of any number of position sets into a travel program
- Step enabling conditions for the travel program possible via digital inputs, for example
 - MC – motion complete
 - I/O – digital inputs

Library for EPLAN

EPLAN macros for fast and reliable planning of electrical projects in combination with motor controllers,

motors and cables.
This enables a high level of planning reliability, standardisation of

Cam disc functionality

The “electronic cam disc” application type creates optimised motion profiles that generate less vibration and lower acceleration forces at the machine. In addition, the movement of the motor is always synchronous in position with a master axis, which enables easy definition of overlapping, time-optimised motion sequences. To be able to use the cam disc function, you will need the Festo Configuration Tool (FCT) and also the curve editor ➔ 23

Key features:

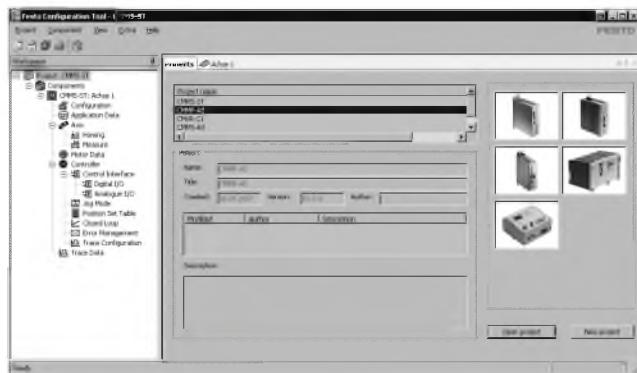

- High flexibility of the system. The mechanics do not need to be modified if the requirements for the curve shapes change.
- User-friendly motion plan editor. All limits for position, speed and acceleration are immediately displayed in the editor.
- Up to 16 cam discs with a total of up to 2048 data points can be managed. The data points can be randomly distributed along the cam discs.
- There are four digital trip cams coupled with each cam disc.
- Each cam disc can be offset by a certain amount from the master axis.

Motor controllers CMMP-AS, for servo motors

Key features

FCT software – Festo Configuration Tool

Software platform for electric drives from Festo

- All drives in a system can be managed and saved in a common project
- Project and data management for all supported device types
- Easy to use thanks to graphically supported parameter entry
- Universal operating mode for all drives
- Work offline at your desk or online at the machine

FHPP – Festo Handling and Positioning Profile

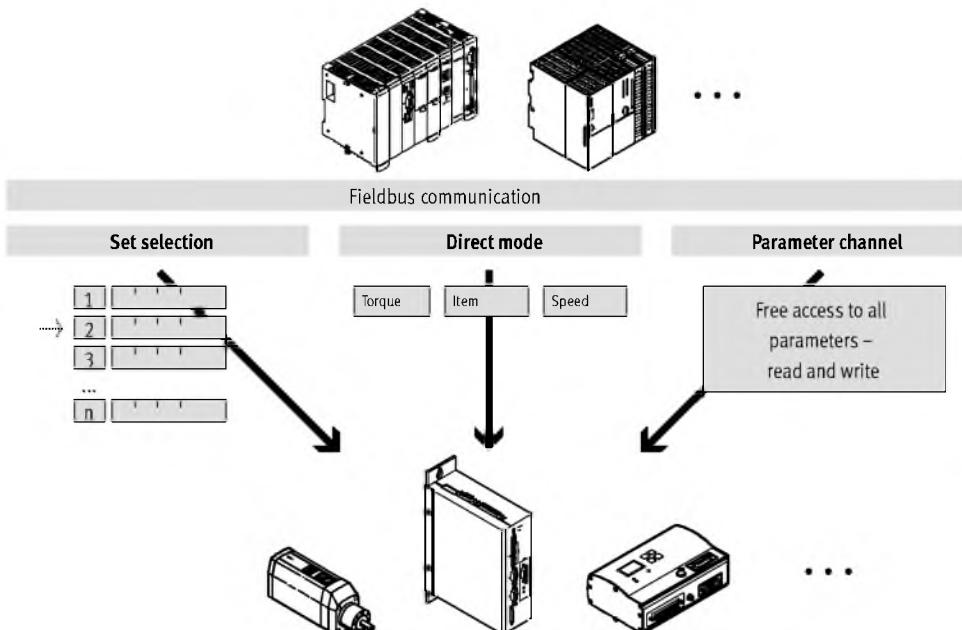

Optimised data profile

Festo has developed an optimised data profile, the "Festo Handling and Positioning Profile (FHPP)", which is especially tailored to handling and positioning applications.

The FHPP data profile permits the actuation of Festo motor controllers, using a fieldbus interface, via standardised control and status bytes.

The following are defined, among others:

- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

Accessories

Technical data	
General information	
Parameterisation	Using SafetyTool, integrated into the FCT plugin for CMMP-AS...
Digital safe inputs DIN 40A/B to DIN 43A/B	
Specification	IEC 61131-2, type 3
Number of 2-channel inputs	4
Nominal voltage [V DC]	24
Operating range [V]	-3 ... 30
Nominal current [mA]	15
Max. nominal current [mA]	200
Properties	Suitable for emergency-stop switchgear, protective door circuit, light curtain, enabling button, two-hand operator unit; Inputs switching equivalently/antivalently; Test pulses can be configured; Function can be configured
Digital safe inputs DIN 44 to DIN 49	
Specification	IEC 61131-2, type 3
Number of 1-channel inputs	6
Nominal voltage [V DC]	24
Operating range [V DC]	-3 ... 30
Nominal current [mA]	15
Max. nominal current [mA]	200
Properties	Suitable for start button, brake feedback, mode selector, error acknowledgement, restart blocking; Test pulses can be configured; Function can be configured
Safe outputs DOUT 40A/B to 42A/B	
Number of 2-channel outputs	3
Output	High-side switch with pull-down
Nominal voltage [V DC]	24
Operating range [V DC]	18 ... 30
Permissible output current [mA]	< 50
Properties	Semiconductor outputs: parameterisable PNP (positive switching) Outputs switching equivalently/antivalently Test pulses can be configured Function can be configured
Monitoring contact C1, C2	
Nominal voltage [V DC]	24
Max. voltage [V DC]	< 30 (overvoltage-resistant up to 60 V)
Nominal current [mA]	< 200 (not short-circuit proof)
Version	Potential-free signal contact
Properties	Suitable for diagnosing safety functions Function can be configured

Motor controllers CMMP-AS, for servo motors

Accessories

Supported position encoders

<ul style="list-style-type: none"> Resolver via X2A SIN/COS incremental encoder SICK Hiperface shaft encoder (only process data channel) 	<ul style="list-style-type: none"> Heidenhain ENDAT encoder Incremental encoder with digital A/B signals 	<ul style="list-style-type: none"> BISS position sensors for linear motors Incremental encoder with digital A/B signals 	<ul style="list-style-type: none"> Implementation Manual HIPERFACE® Safety dated 21.12.2010 Specification of the E/E/PES safety
The manufacturers of SIL-certified shaft encoders publish guidelines for the use of these shaft encoders in safety applications.	The safety module CAMC-G-S3 takes the following manufacturer specifications into account when evaluating the encoder signals:		

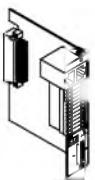

Permissible combinations of position encoders

First encoder	Second encoder	Achievable safety level	Note
Resolver	Other encoder	SIL 3	Cat. 3/PL d; Cat. 3/PL e
Resolver	Incremental encoder	SIL 3	Cat. 4/PL e
Resolver	None	SIL 2	Cat. 3/PL d
SIN/COS incremental encoder	None	SIL 3	Cat. 3/PL d
SIN/COS incremental encoder	Incremental encoder	SIL 3	Cat. 4/PL e
Hiperface incremental encoder	Incremental encoder	SIL 3	Cat. 3/PL e
Hiperface incremental encoder	None	SIL 2 or 3	Cat. 3/PL d; Cat. 4/PL e
ENDAT encoder	Incremental encoder	SIL 3	Cat. 4/PL e
ENDAT encoder	None	SIL 2	Cat. 3/PL d
Other encoder	Incremental encoder	SIL 2	Cat. 3/PL d

Note

- Please assess whether your selected position encoder is sufficiently accurate to fulfil the monitoring task, in particular the SOS safety function.
- In applications with only one shaft encoder/position encoder, it must have the SIL classification required in accordance with the risk assessment. In most cases, the classification requires additional requirements or fault exclusions in the mechanical system. Please check carefully that these requirements are fulfilled in your application and that the appropriate fault exclusions can be performed.
- In applications with only one shaft encoder/position encoder with analogue signal interface (resolver, SIN-/COS, Hiperface etc.), the restrictions regarding diagnostic cover and limitations as to the accuracy of rest and speed monitoring that can be achieved must be taken into account.
- When using two functional encoders without SIL classification, the suitability of the encoder combination for use in safe systems up to SIL3 must be proven separately (for example, the following are required: diversity of the encoder systems with regard to CCF, MTTFd, etc., suitability of the encoders for the operating and ambient conditions, EMC, etc.).

Ordering data – Plug-in card

Description	Part No.	Type
 Safety module: <ul style="list-style-type: none"> One of the plug-in cards CAMC-G-S1, CAMC-G-S3 or CAMC-DS-M1 must be inserted in slot 7 (→ 11) in order to operate the motor controller The plug connectors are included in the scope of delivery. To reorder plug connector NEKM → 22 	1501331	CAMC-G-S3

New
CMMMP-AS-C15-

Motor controllers CMMMP-AS, for servo motors

Accessories

Interface CAMC-D-8E8A

Only for motor controller:
CMMMP-AS-...-M3

The interface is used to extend the digital I/Os.

Up to two interfaces are supported simultaneously.

Technical data

General information

Max. connection cross section	[mm ²]	0.5
Electrical connection		Screw terminal
		Straight plug

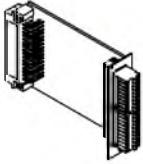

Digital inputs

Number	8	
Nominal voltage	[V DC]	24
Voltage range	[V]	-30 ... +30 (protected against reverse polarity and short circuit proof)
Nominal value for True	[V]	8
Nominal value for False	[V]	2
Input impedance	[kΩ]	4.7

Digital outputs

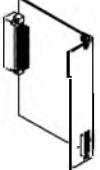

Number	8	
Nominal voltage	[V DC]	24
Voltage range	[V]	+18 ... +30 (protected against reverse polarity and short circuit, protection in the event of thermal overload)
Output current	[mA]	100
Short circuit, overcurrent protection	[mA]	500

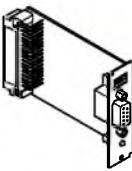

Ordering data – Plug-in card

	Description	Part No.	Type
	Interface: for additional I/Os (The plug connectors are included in the scope of delivery. To reorder plug connector NEKM → 22)	567855	CAMC-D-8E8A

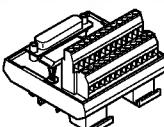

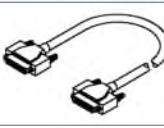

Motor controllers CMMP-AS, for servo motors

Accessories

Ordering data – Plug-in card			
	Description	Part No.	Type
	Switch module: • One of the plug-in cards CAMC-G-S1, CAMC-G-S3 or CAMC-DS-M1 must be inserted in slot 7 (→ 11) in order to operate the motor controller CMMP-AS-...-M3	1501329	CAMC-DS-M1

Ordering data – Plug-in cards for fieldbus interface			
	Description	Part No.	Type
	For PROFIBUS DP For PROFINET RT For DeviceNet For EtherCAT For EtherNet/IP	547450 1911916 547451 567856 1911917	CAMC-PB CAMC-F-PN CAMC-DN CAMC-EC CAMC-F-EP

Ordering data – Memory card			
	Description	Part No.	Type
	Memory card, for data backup and firmware download	1436343	CAMC-M-S-F10-V1

Ordering data – Connection options from I/O interface to controller				
	Description	Cable length [m]	Part No.	Type
Control cable				
	• For I/O interface to any controller • Recommended for analogue signals since the cable is shielded	2.5	552254	NEBC-S1G25-K-2.5-N-LE26
	• For I/O interface to any controller • Cannot be used if the incremental encoder interface (X10 plug) is in use	3.2	8001373	NEBC-S1G25-K-3.2-N-LE25
Connection block				
	Ensures simple and clear wiring. The connection to the motor controller is established via the connecting cable NEBC-S1G25-K-....	–	8001371	NEFC-S1G25-C2W25-S7
Connecting cable				
	• Connects the motor controller to the connection block • Cannot be used if the incremental encoder interface (input) is in use	1.0 2.0 5.0	8001374 8001375 8001376	NEBC-S1G25-K-1.0-N-S1G25 NEBC-S1G25-K-2.0-N-S1G25 NEBC-S1G25-K-5.0-N-S1G25
Plug connector				
	• 25-pin Sub-D plug connector. Each wire can be individually assembled using screw terminals • Cannot be used if the incremental encoder interface (input) is in use	–	8001372	NEFC-S1G25-C2W25-S6
